

A European Federated Network of Information Exchange in Future Logistics

*To support the transition to
seamless data sharing*

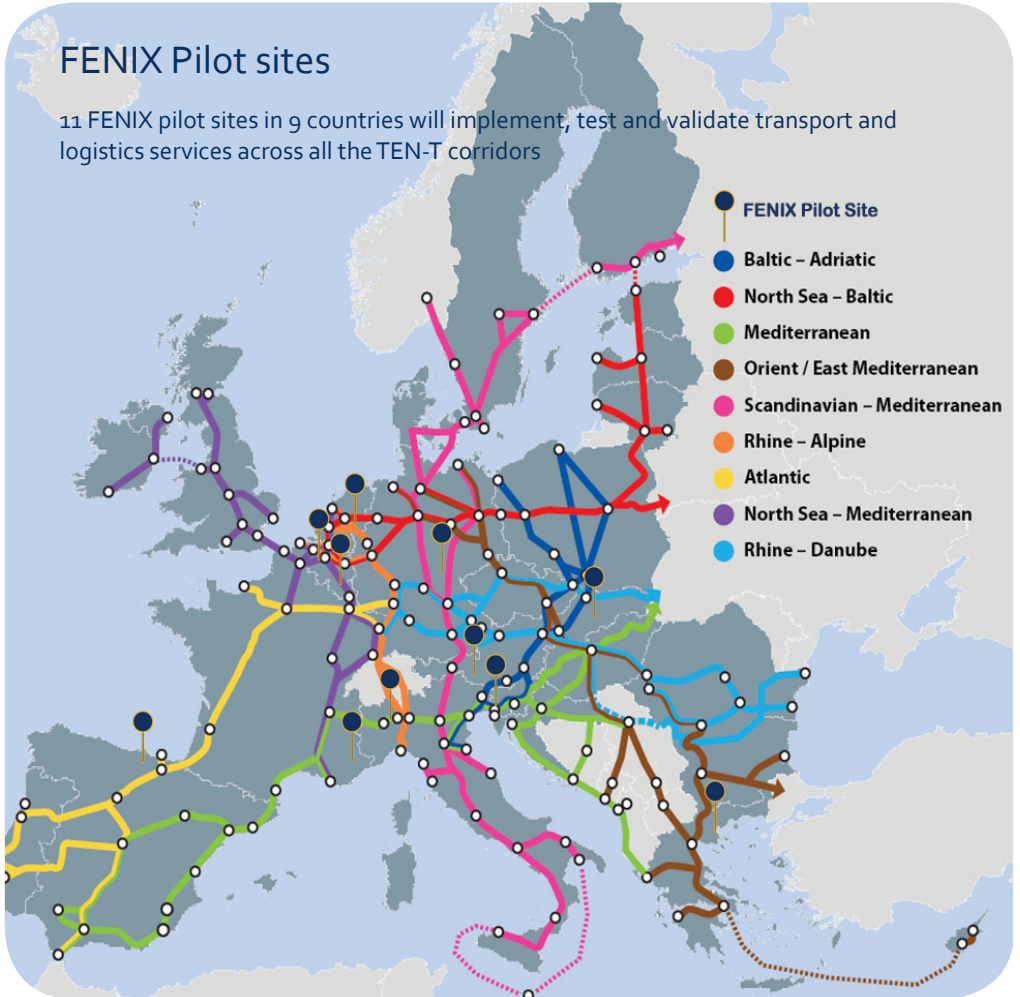

- 36 Months
- 11 Pilot Sites
- 43 Beneficiaries
- 9 TEN-T corridors

FENIX will develop the first European federated architecture for data sharing serving the European logistics community of shippers, logistics service providers, mobility infrastructure providers, cities, and authorities in order to offer interoperability between any individual existing and future platforms.

FENIX Pilot sites

11 FENIX pilot sites in 9 countries will implement, test and validate transport and logistics services across all the TEN-T corridors
